

## River Sport Fishing

The River fishing tour takes place on the Sierpe river . It's a big, quiet deep river that has an abundance of animal and plant life. Much of the shore consists of mangroves or the local Lirios and Platanillas.

As you can see, the area is ideal for the habitats of young and old fish, many shrimp and crabs, as well as many others that are part of the food chain.

In the river the common types of fish are Mangrove Snapper, Snook, Weakfish, Grouper, and Machaca among others. And their sizes vary from 30 cm- 1.5 meters.

Our fishing team that we have available for you is of the best quality.

How do we fish?

You can fish the Sierpe river in several ways. The one we recommend the most is trolling. We also have good casting or fishing with shrimp, mullet or crabs.

The fishing tour on the river lasts about 7 hours and the boat usually leaves 3 hours before low tide and comes back 4 hours growing towards hi tide.

Also you can enjoy the Sport Fishing near to Cano Island and along the Coast. For more information visit: [www.sierpe-fishing.com](http://www.sierpe-fishing.com)
